

Testimonial in Appreciation for Teacher Flora Koh

We highly recommend Flora Koh as a Math teacher/tutor. We had the pleasure of working with her on our child's aptitude for Maths since past 2 years. She has a very organised, disciplined and meticulous approach in teaching. Apart from that she has well developed an inspiring relationship with our child Anish.

She studied Anish's performance, strengths and weaknesses when he first started in 2016 and tailored the study resources that suited his progress in a gradual yet certain course. She also shared examples of practical and realistic goal setting that helped Anish gain confidence in his performance. She has a wonderful rapport with our son to convince him as well as influence him to feel motivated as well as determined with efficiency, speed and presentation. Her ability to connect with her students and her talent at teaching simple as well as more advanced topics, are both a blessing to her as well as for her students.

She accomplishes all these tasks with great initiative, a positive attitude and compassion for the keen learner. We are assured that any child would surely improve or excel with willingness to put in an equivalent effort under her guidance as a Math teacher.

Words of gratitude expressed for Flora from my child Anish

"Good teachers are like visionary leaders, they inspire young hearts as they ignite their students' passion for learning.

I joined Teacher Flora's tuition at the start of primary 5. From then on, she had encouraged me to set the target for PSLE, A star. I was confident about my target at first, but sometimes I had doubts and my hopes kept fluctuating. She constantly reminded me to focus on what I had to do to achieve my goal instead of thinking whether I would achieve it or not. Throughout the two years, she taught me her creative methods and made them easy to remember. For example, while teaching me corresponding and alternating angles, she used alphabets to give me a grasp of how the angles look like and just like that she made it into an acronym. She also has other ways to remember using day to day examples of food and necessities. She has her own framed worksheets to gain practice on her trained methods as well.

Just like that, my boredom and hatred for Math grew into a passion and enjoyment. Soon I was looking forward to tuitions with her as it never felt like a burden but a break from the stressful PSLE environment. She also gave me advice on schools to choose and shared perspectives from her experience.

So far, she is one of the best Math teachers I have had who encourages me to strive towards my purpose. She equally deserves the credit for me to get an A star as my motivator. She didn't just teach me Math but in the process taught me to look at things in a different way. Her hard work and determination she puts into her students has certainly made her a great influence and role model for me, bonding me to her like a second mother. I Thank her for being there.

Teacher Flora, a great teacher like you, offers a hand to open a mind and touches a heart."
